Questions for today's meeting:

1. Are there criteria by which locations are evaluated for outdoor sheltering? ([We have suggested some](#))
2. What locations have been evaluated? When were they evaluated? Has Central Park been evaluated?
3. What are the rules currently? The bylaws do not give exact measurements E.g. how many meters from children's play structures? Space between tents?
4. If there aren't rules - what is the plan for creating some?
5. Communication of these rules to both those sheltering, park users, and nearby residents. Signage? Email? How can people receive answers to direct questions about sheltering in parks?
6. How does the Central Park covenant factor in here?
7. How is equity being centred in this discussion?

Anyone who is a registered NPNA member in good standing may vote at our public meetings.
